

# NOTICE OF A PROPOSED CHANGE TO AN APPROVED RENEWABLE ENERGY PROJECT (REA No. 0494-99WL4Q)

For GoldLight  
By GoldLight LP

Project Name: GoldLight  
OPA Reference Number: FIT-F9LD35S  
Project Location: 7130 Old Homestead Road, Part of Lot 8 and Part of W1/2 Lot 9, Concession 5, Georgina  
Dated at the Town of Georgina this 12 day of November, 2015

GoldLight LP was issued a Renewable Energy Approval on September 11, 2013 in respect of the GoldLight project. The approval was subsequently amended on November 12, 2014 to accommodate the final design layout for the project. Information with respect to the decision on this project can be viewed on the Environmental Registry by searching 012-2982.

GoldLight LP is proposing to make additional changes to the project and the project itself is subject to the provisions of the *Environmental Protection Act (Act)* Part V.0.1 and Ontario Regulation 359/09 (Regulation). This notice must be distributed in accordance with section 32.2 of the Regulation. This notice is being distributed to make the public aware of a proposed change to the project.

#### Project Description and Proposed Changes:

Pursuant to the Act and Regulation, the project in respect of which the Renewable Energy Approval (REA) was issued, is a Class 3 Solar Facility. An application has been made to the Ministry of the Environment and Climate Change (MOECC) to change the project and alter the terms and conditions of the existing Renewable Energy Approval. The proposed changes consist of an administrative change to the municipal address of the facility (due to an updated land survey), and a slight shift in the location of the main substation transformer. The final design layout for GoldLight maintains all components of the facility within the original boundaries of the project location in the original REA application. The revised NSR concludes that the project can be operated in compliance with the MOECC's noise criteria.

If approved with these changes, the facility would have a total nameplate capacity of 10 MW. The project location, taking the change into account, is described in the map below.

#### Documents for Public Inspection:

GoldLight LP has been required to update the supporting documents that are required to form part of the application or which must be otherwise submitted to the Ministry of the Environment and Climate Change and made available to the public (entitled *Modifications Document for GoldLight*). A copy of the supporting documents will be made available for public inspection during the week of November 9, 2015 on the project website at [www.goldlightsolar.com](http://www.goldlightsolar.com).

#### Project Contacts and Information:

To learn more about the project proposal or to communicate concerns, please contact:
